

National Tour World Tennis Number Bands – October 2023

After a transition period, the World Tennis Number (WTN) will replace any other parameters previously used (ITN, Munster Grading, DLTC class). To make the use of the WTN easier for players and tournament organizers, Tennis Ireland has created the table below showing the highest value a player can play in a level.

- Players must enter the events that cater for their level of play. They can enter events above their level, but not below it.
- Only WTN values with a confidence rate of 70 or higher should be used. Values with a lower confidence rate should be taken at the discretion of the organizing committee.
- The table is reviewed and updated every 6 months.
